

# The Enterprise Fuel Management Solution

## FuelPlus One – The Hosted FuelPlus Solution

FuelPlus One is FuelPlus' hosted solution especially designed for small to mid-size airlines that wish to use the proven FuelPlus EFM functionality without investing in additional IT resources.

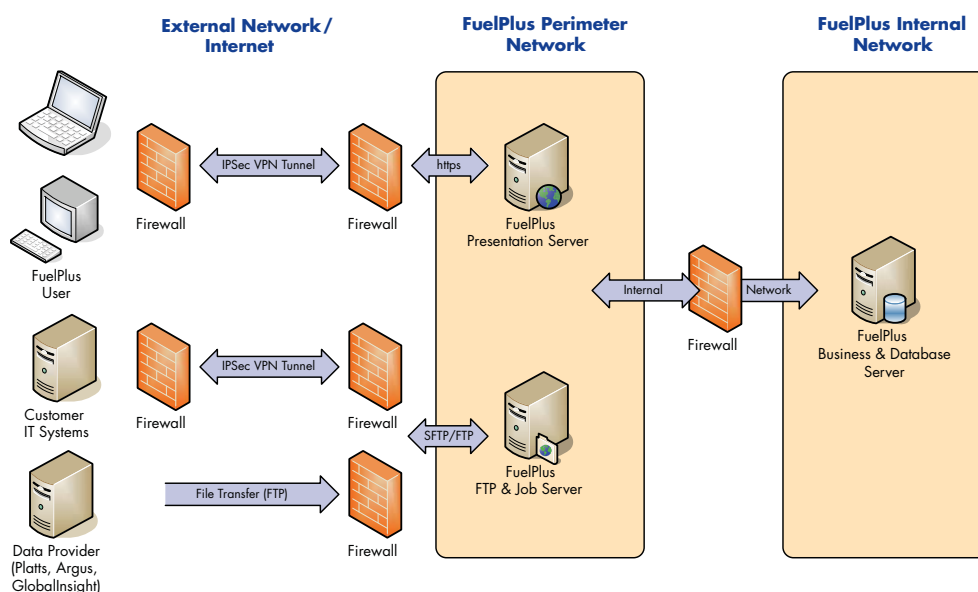

Based on FuelPlus' enterprise fuel management solution FuelPlus EFM, FuelPlus One supports all business functions required by airlines to manage their airport-related fuel business, which includes contract management, handling of flight events and fuel messages, and invoice checking.

The FuelPlus One solution is hosted in a secure computer center, which guarantees both quality of service and security of data. FuelPlus specialists take care of the daily operation and provide support to end users.

Corporate FuelPlus One customers connect to FuelPlus One via secured data lines. Commuting customers can work from anywhere in the world to access their FuelPlus One account.

The following diagram illustrates a typical FuelPlus One set-up:

## FuelPlus One – The Hosted FuelPlus Solution

---

FuelPlus One combines FuelPlus' airline best practices with a low-cost solution and professional services, and it provides significant benefits:

- Same proven FuelPlus EFM technology used by world renowned airlines.
- FuelPlus implementation process ensures predictable timelines and reliable results.
- Predefined system configuration reduces implementation time.
- Hosted IT infrastructure lowers implementation costs.
- FuelPlus specialists take care of all day-to-day operational activities.
- Product improvements are made available on a regular base.
- Global access to FuelPlus One instance via secure VPN connections.

FuelPlus has a proven track record, after use, of cost savings in the fuel management process once the entire team uses the same system.

As of September 2008
